

COMPANY PROFILE · 2026

SpecOps HQ

Beyond borders, securing futures.

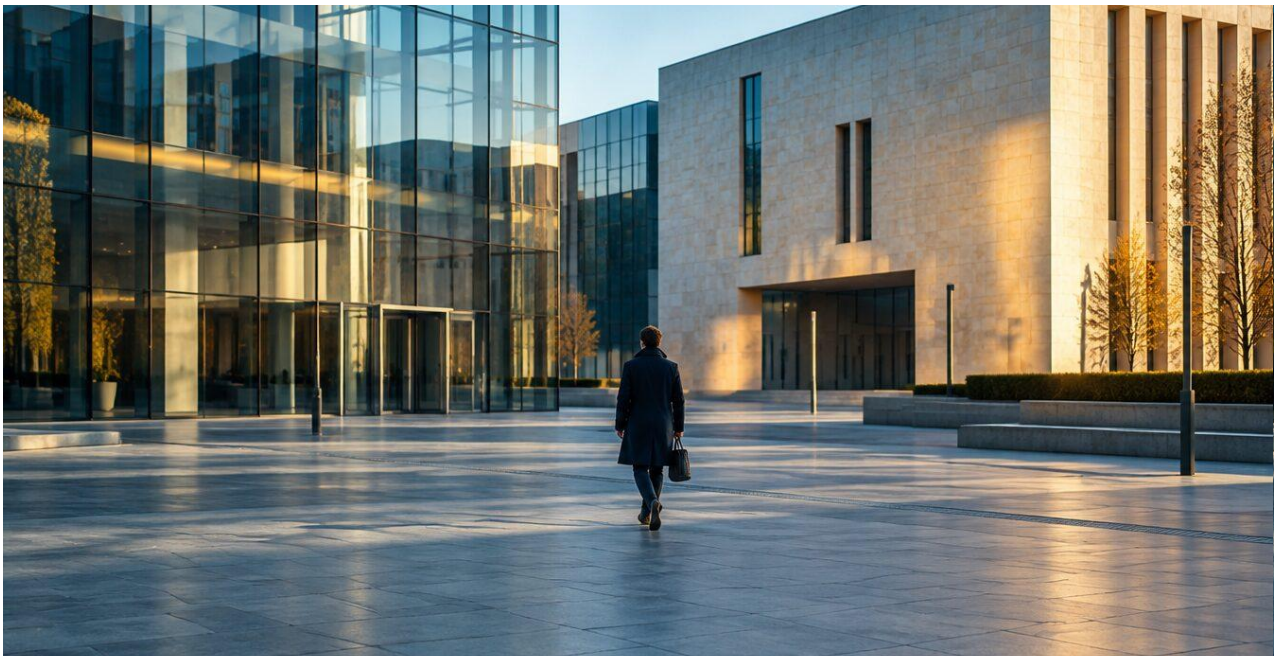

One Integrated System

Global security, intelligence and risk advisory operating across eight specialist divisions as one integrated system.

SpecOps HQ is an institutional security, intelligence, risk advisory and training firm, headquartered at Schiphol, the Netherlands.

Eight specialist divisions operate as one system across three domains: Understand, Operate and Enable. Each division works independently and stays structurally connected. No duplication. No blind spots.

Every engagement is mandate-aligned, intelligence-informed and handled with discretion.

UNDERSTAND

Know the environment.

Transform information into operational understanding and strategic decision advantage.

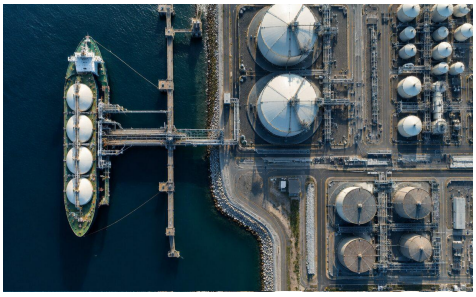

SOI

Intelligence Solutions

Intelligence that anticipates.

Structured analytical intelligence for sovereign, institutional, and high-exposure environments requiring decision clarity before operational movement.

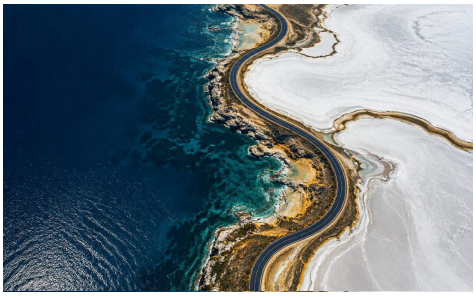

SOR

Risk Advisory

Clarity when it matters.

Translating intelligence into structured decision frameworks before uncertainty becomes exposure.

SOX

Strategic Insights

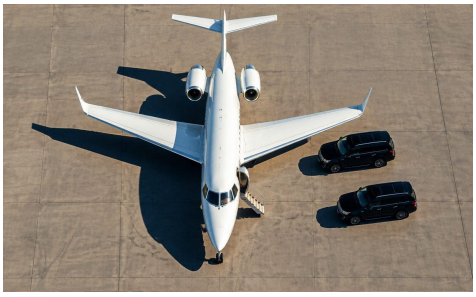

Insight before action.

Structured analysis and long-form intelligence products. Operational experience, translated into decision-grade insight.

OPERATE

Execute with confidence.

Deliver security, crisis response and operational readiness where it matters most.

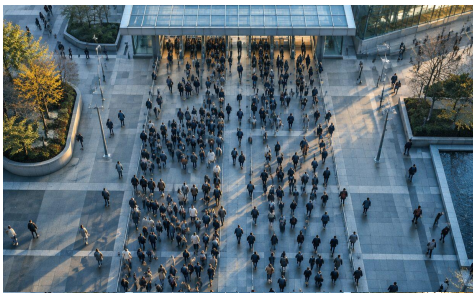

SOS

Security Solutions

Security through discretion.

Operational security architecture for sovereign, diplomatic, corporate, and high-exposure environments. Intelligence-informed. Mandate-aligned. Deployable.

SOC

Crisis Response

Response beyond readiness.

Structured intervention when risk materialises and operational continuity is threatened.

SOT

Training Solutions

Train as you operate.

Structured operational capability development built on the ASC Framework. Awareness, Stability, Control. Sequential readiness architecture for individuals, teams and institutions operating where conditions shift without warning.

ENABLE

Build lasting capability.

Develop leadership, doctrine and operational resources that strengthen organisations over time.

SOL

Leadership and Resilience

Resilience in leadership.

Conditions change. Information becomes incomplete. Decisions still have to be made. SOL develops the discipline to lead through it.

SOF

SpecOps Operational Framework

Capability before equipment.

SOF turns a standard, a guideline or an insurer's requirement into a complete capability package: assessment, fit-out, tier 1 equipment, training and annual assurance.

HOW WE ENGAGE

01
Brief

A structured brief describes the environment and the mandate.

02
Review

A designated lead reviews it personally, within 24 to 48 hours.

03
Mandate

Objective, scope, duration and reporting are agreed.

04
Delivery

The responsible divisions deliver as one system, with continuous review.
